## Kamloops Area Management Planning Pilot Project Binder Approvals Page

### Forward

This binder contains 16 management plans developed under the Kamloops Area Management Planning Pilot Project. This project began in 1994 to develop, implement and evaluate a systems approach to management planning. The project concluded in October, 1996. The management plans contained in this binder provide long-term direction for a group of 10 Class A parks, five ecological reserves and one recreation area. The intention is to review this binder and the plans contained here at regular intervals. Plan vision statements and objectives will not change extensively over time. Management actions, however, will change as priorities, funding and support resources come available.

***WALLOPER LAKE PROVINCIAL PARK***

***MANAGEMENT PLAN***

**INTRODUCTION**

This management plan defines the role of Walloper Lake Park within the provincial park system and the objectives and guidelines for managing the resources and visitor use activities in the park.

The park role, objectives and zoning as stated in this plan cannot be contravened in meaning or intent without consultation with the public and approval of the District Manager and the Parks Management Committee (PMC). A five year business plan is included as appendix B to provide direction for management and development of the park. The business plan is subject to annual review and adjustments.

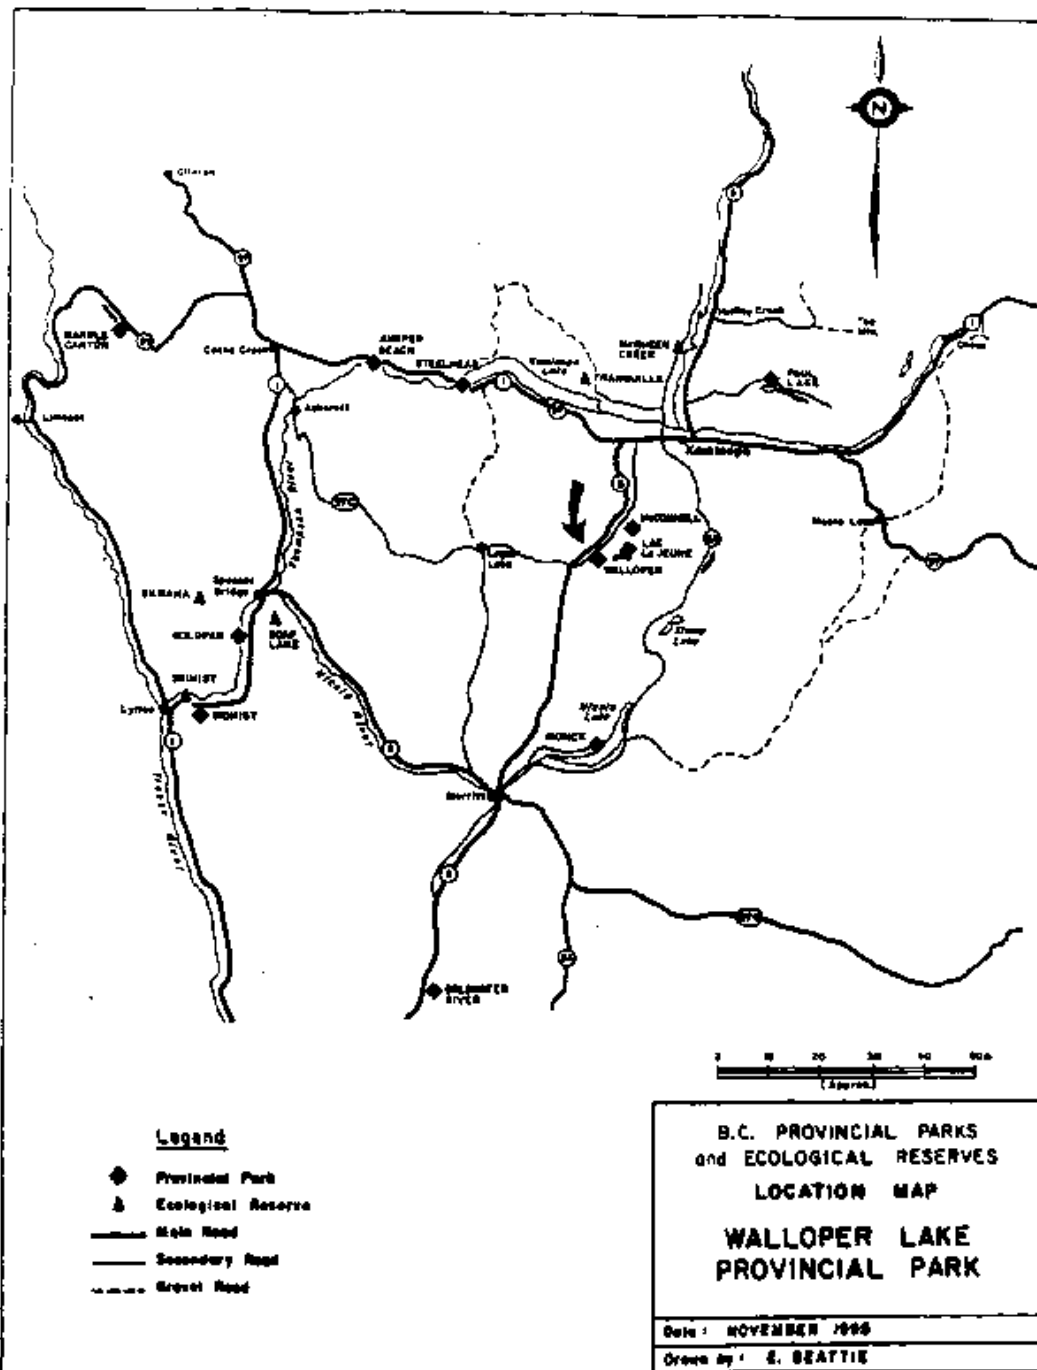

**BACKGROUND**

**Location:** Immediately south of the Coquihalla Highway Lac le Jeune - Logan Lake interchange.

**Historical Perspective**

In 1987, coinciding with the opening of the Phase 2 (Merritt to Kamloops) section of the Coquihalla Highway, the Land Act Reserves (UREP) on Walloper Lake were converted to provincial Class A Park status. Prior to that time Walloper Lake had been managed as a Forest Recreation site, but the strategic location of the site led to interagency agreement that it would be ideally suited to eventually serve tourist day use travel needs on the Coquihalla Highway while retaining regional day use opportunities.

With concerns that the close proximity of the highway would lead to overloading of the site with transient use, the new park site was closed to camping and travellers were instead directed to use the Lac le Jeune campground. Since that time, the park has been managed as a low profile day use facility, catering mostly to regional use.

## **Protected Area Values**

### **Conservation:**

Partial representation of montane spruce forests and plateau lake setting of the Southern Thompson Uplands Ecosection; Park boundaries encompass much of the natural shoreline and upland around lake.

### **Recreation:**

Pleasant lake setting for day use opportunities with potential for campground development.

Provides access to a locally significant fishery suited to families and anglers who wish to catch numerous, relatively small size (1/2 kg) trout.

### **Cultural:**

No known archaeological or other cultural values.

## **Other Agency Interests**

BC Environment is involved with fisheries management of Walloper Lake and maintains an aerator to prevent fish winter kill.

## **Private Sector Interests**

No known private interests in the Park.

## **First Nations Interests**

No known native interests in the Park

## **Existing Land Uses and Encumbrances**

Wallop Lake is a licensed storage reservoir used in support of irrigation licences:

Conditional Water Licence 14832 issued to Noel Mitchell to divert and use water from lake

Conditional Water Licence 14833 issued to Noel Mitchell to store water in lake in conjunction with CWL 14832

Conditional Water Licence 67326 issued to Fisheries Branch to divert and use water from Lake and Melba Creek for maintenance of fish spawning conditions

## **ROLE OF THE PARK**

For the foreseeable future, Wallop Lake Provincial Park will continue to fulfil its present roles:

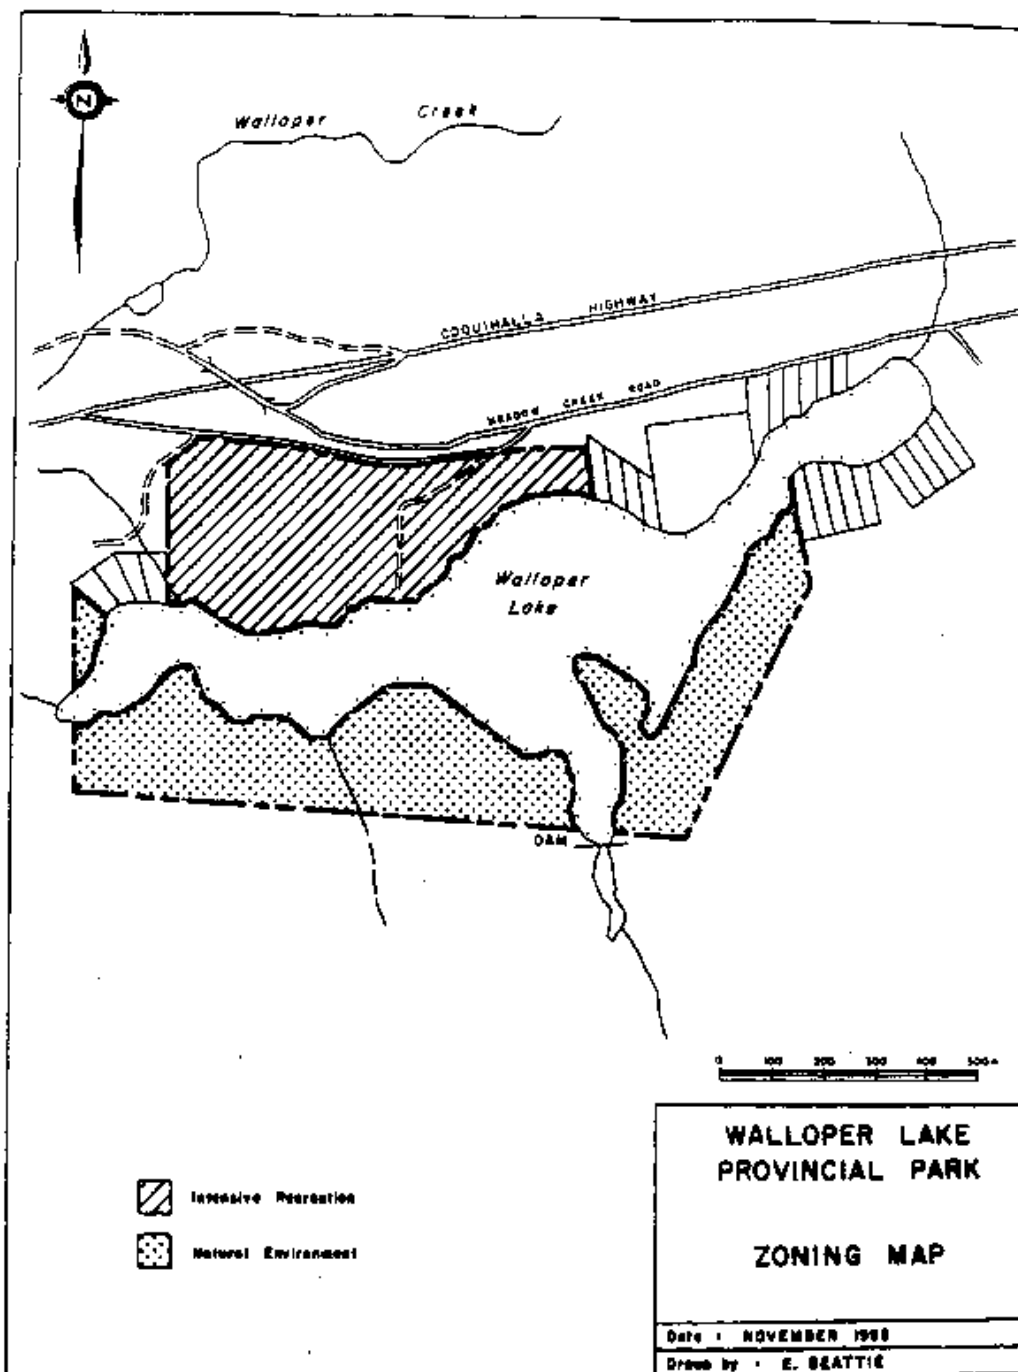

### **For Conservation**

- To protect a representative example of montane spruce forest conditions and a plateau lake setting of the Southern Thompson uplands.
- To maintain a locally significant recreation fishery.

### **For Recreation**

- To provide opportunities relating primarily to regional day use. Recreation activities will include fishing, canoeing, boating and picnicking.
- To maintain the land base as future option for campground, and summer and winter day use facility developments.

## **VISION STATEMENT**

*Walloper Lake Park will continue to serve as a low profile day use site serving primarily the local and regional population base.*

## **ZONING**

The park is separated into two zones:

### **Intensive Recreation**

This zone sets limits for facility development and includes the existing day use site as well as land that may be developed for expanded day and/or campground use in the future.

### **Natural Environment**

This zone takes in the remaining portions of the Park. The intent of this zone is to protect and maintain the natural forested conditions on the crown upland portions around the lake.

## **MANAGEMENT CONCERNS AND OBJECTIVES**

### **Conservation**

To co-ordinate with the Fish and Wildlife Branch in fisheries management at Walloper Lake to maintain a healthy and popular rainbow trout fishery.

To maintain natural, undeveloped conditions in the natural environment zone and to protect adjoining riparian and shoal habitats.

To protect the integrity of natural plant and animal species and communities found in the park. Infestations of noxious weeds will be controlled and fire outbreaks will be suppressed. Native insect and disease species will be accepted as a normal course of nature, unless there is potential impact to the surrounding commercial forest land base.

**Recreation**

To maintain the present fishery catering primarily to families and anglers who enjoy opportunity to easily (relatively) catch small fish.

To maintain day use facilities at low profile and informal (service level 4 - see appendix A) standards. A primary objective is to limit vehicle use and impacts to the immediate day use facility site. The site will not be signed directly off of Meadow Creek Road.

To maintain options in the intensive use zone for possible future expansion of day use and development of campground facilities.

## Appendix A - Service Level Explanation

BC Parks service levels provide a method of defining the facilities, information and services which the public can expect within the BC Provincial Parks system. The service levels do not include any measure of the capacity or use of the area, operating standards, or resource management issues. Instead, they are strictly a list of the key facilities and services that may be provided within a particular campground or day-use area. They also provide an opportunity to explore and understand the relationship between the facilities and services BC Parks offers and the expectations of the users or potential users. This will help in making decisions based on the type and grade of facilities and services that BC Parks plans to provide and their associated costs.

**Table 1. Campground Service Levels Attributes**

Attribute	Level 1	Level 2	Level 3	Level 4
<b>Facilities</b>				
▪ Roads	paved	paved	usually gravel	gravel, dirt or none
▪ Toilets	flush	usually flush	pit	pit or none
▪ Water system	pressure	pressure	pressure or handpump	not usually supplied
▪ Campsites	standard design	standard design	standard design	informal (non-standard)
▪ Tables	Type I	Type I	Type I or II	Type II
▪ Sani-station	available	available	not usually available	not available

## **APPENDIX “B” FIVE YEAR BUSINESS PLAN**

### **Wallop Lake**

Goal: To identify, maintain and protect the park’s natural and cultural resources.

Action: Develop a resource management plan

Goal: Improve day use facilities.

Action: Prepare a development plan and secure funding.

Goal: Maintain a fishery.

Action: Manage cooperatively with fisheries branch.
