APPROVALS

KAMLOOPS GOAL 2 PROTECTED AREAS MANAGEMENT DIRECTION STATEMENTS - GOAL 2 BINDER APPROVALS PAGE

Forward

This binder contains 32 management direction statements developed under the direction of the Kamloops Land and Resource Plan Implementation Table and BC Parks. The government designated these protected areas in May, 1996. The 32 management direction statements provide strategic direction for these protected areas. Protected areas' roles, strategies and objectives will not change extensively over time. Management actions, implemented through operations plans, however, will change as priorities, funding and support resources come available.

Purpose of Management Direction Statements

Management Direction Statements provide strategic management direction for all protected areas that do not have a full management plan. MDS do not negate the need for future, more detailed management plans. Management Direction Statements also describe protected area values management issues and concerns; management strategy focused on immediate priority objectives and strategies; and, directional statements from other planning processes. While strategies may be identified in the MDS, the completion of all these strategies is subject to funding and funding procedures. In addition, all development associated with these strategies within the protected area is subject to the BC Parks Impact Assessment Policy.

MONTE CREEK PARK

MANAGEMENT DIRECTION STATEMENT

I. Introduction

A. Setting and Context

The 1.7-hectare Monte Creek Park protects a small area of river riparian on the South Thompson River. It is situated 26 kilometers east of Kamloops at Monte Creek.

This protected area was recommended through the Kamloops LRMP process and formally established on April 30th, 1996 as a provincial park through Order-in-Council under the *Park Act*. The park was then designated in Schedule E of the *Park Amendment Act, 1997*.

This Management Direction Statement is intended to provide direction and guidelines for managing Monte Creek Park for the foreseeable future.

II. Protected Area Values

A. Conservation

- treed river riparian and grassland highly disturbed by previous agriculture
- South Thompson has internationally important salmon runs; salmon habitat upstream

B. Recreation and Tourism

- potential for boating access, day use and camping opportunities on the South Thompson River, close to the Trans Canada Highway
- potential for interpretation for the rich native history of the site

C. Cultural Heritage

- significant site in the history of Shuswap use of the South Thompson; much has been destroyed in the recent past, but remnants of kekuli pit houses remain. Site included tunnels joining round and square pit houses, river-facing entrances, underground ovens, possible burials. This site has interpretation potential. Documented archeological site.
- route of old Brigade Trail, historical Monte Creek church and schoolhouse, reaction ferry across the South Thompson River in the vicinity
- interpretation of farming use of property and surrounding area (existing structure and equipment on site has no historical value and should be removed).

D. Significance in the Protected Areas System

- representation of important Shuswap cultural heritage in the South Thompson River bottomlands not found in any other protected area
- one of a few small sites on the South Thompson that together represent the variety of habitats and cultural heritage (Banana Island, Pritchard Riparian)

- P62 Tsintsunko Lakes Park
- P63 Walhachin Park
- P64 Wire Cache Park

III. Other Land Uses and Interests

A. Existing Tenures

- all private lands are excluded
- Park designation under the *Park Amendment Act* ensures that all existing liens, charges, and encumbrances other than those applying to commercial logging, mining or energy exploration and development will continue to be authorized through issuance of park use permits. This policy recognizes all existing land act tenures, water rights, trapping licenses and other legal tenures and rights.

B. Adjacent Patterns of Land Use

- residential area on the east; Canadian Pacific Railway, Trans Canada Highway and BC Hydro rights of way to the south

C. First Nations Interests

- Management of the park will require ongoing consultation with the Shuswap Nation to incorporate First Nations interests.

D. Other Agency Interests

- The Park will be managed in close coordination with various resource agencies, particularly BC Environment and Department of Fisheries and Oceans (Government of Canada).

E. Private and Public Stakeholder Interests

- local residents will have to be consulted prior to any development to discuss public access and use implications

IV. Management Issues and Concerns

A. Integration with Other Land Use Planning Processes

This management statement, future management plans, and all resulting management actions will follow the intent and criteria set out by the Kamloops LRMP for the Monte Creek protected area.

B. Consultation and Future Planning

Planning and management of the park will conform to the goals, objectives and guiding principles as set forth in the Provincial Protected Areas Strategy. BC Parks is accountable for planning, administration and management of the park through application of the laws, policies and regulations granted under the *Park Act*. BC Parks will coordinate with other agencies, the LRMP table, various public planning groups and First Nations in amending the MDS or developing management plans for all of the new protected areas arising from the Kamloops LRMP.

This Management Direction Statement has been reviewed and approved in principle by the Kamloops LRMP implementation team.

C. Role of the Park

As one of only three park sites on the South Thompson River, the Park has potential to serve an important role in providing a key access point for boating and recreation access to the river. The site could also provide a strategic location for transient camping/day use and interpretation of historic and archaeological values

D. Zoning

The zoning plan as shown on the adjoining page reflects the intent of the LRMP recommendations for Monte Creek Park. The Park is zoned as **Natural Environment** to maintain the area in its present condition.

E. Management Objectives and Strategies

In addition to accepting the basic principles of maintaining existing tenures and rights, the following objectives will direct the long-term management of the area:

- to maintain the natural qualities and conditions of the park
- to foster relationships with First Nations through ongoing consultation and discussion of their concerns and views on protected area management and planning
- to conserve cultural heritage resources
- to maintain the visual, recreational and tourism values
- to discourage the introduction of non-native plant species
- to maintain options for future recreation development and use
 - ⇒ Secure and stabilize the site for future use and development.
 - ⇒ Discourage recreation use until the park is formally developed.

F. Longer Term Issues and Concerns

Specific issues that will be considered in the longer term can be highlighted under the following topics:

Conservation

- inventory of conservation values
- vegetation management - protection of riparian areas for shade, food supply for trout and salmonids; insect and disease control; fire management

Figure 2 - Zoning Map

Recreation and Tourism

- access management with respect to adjacent residential area
- recreation use - appropriate activities, levels of development, types of facilities, carrying capacities

Culture

- inventory of archaeological sites
- protection of archaeological sites
- recognition of any identified traditional native uses, in conjunction with Shuswap Nation

G. Short Term Issues and Concerns

The following Activity/Use Matrix outlines guidelines for managing uses, activities and facilities in the Park. These guidelines reflect the intent of the LRMP and, in general principle, follow the policies as set out for use and management of provincial park natural environment zones.

Appendix - Activity / Use Matrix for Monte Creek

Activity/Use Facility	Natural Environment
Hunting	N
Fishing	Y
Trapping	N2
Grazing (domestic livestock)	N
Recreational Gold Panning/Rock Hounding	N
Utility Corridors	N2
Communication Sites	N2
Horse Use/Pack Animals	N
Guide Outfitting (hunting)	N
Guide Outfitting (fishing)	Y ²
Guide Outfitting (nature tours)	Y ²
Guide Outfitting (river rafting)	Y ²
Cat-Assisted Skiing	N/A
Ski-Hills	N/A
Heli-skiing	N/A
Heli-hiking	N
Tourist Infrastructure - Resorts	N/A
Backcountry Huts / Lodges / Cabins / Guest Ranches	N/A
Water Control Structures	N2
Fish Stocking and Enhancement	N1
Road Access	Y ¹
Off-road Access (snowmobiling)	N/A
Off-road Access (motorized)	N
Off-road Access (mechanical activities)	N
Motorized Water Access	Y
Aircraft Access	N
Fire Management (Prescribed) Wildlife Management Prevention & Preparedness Prescribed Fire Management	N1
Fire Management (suppression)	Y
Forest Insect / Disease Control	N1
Noxious Weed Control	Y
Exotic Insect / Disease Control	Y
Scientific Research (specimen collection)	N1
Scientific Research (manipulative activities)	N1

Y= allowed, subject to conditions identified in the interim management statement or management plan
 N= not allowed
 N1= allowed for expressed management purposes only
 N2= not normally allowed, but if present at time of PA establishment, will normally be allowed to continue

¹ Road access plan for this area designates open and closed roads
² By permit only
³ On designated trails only
⁴ On designated lakes only
